

SANITIZING INSTRUCTIONS

- **REQUIREMENT:** Before a catcher's helmet/mask worn by one player may be used by another player, the gear must either be set aside for at least 48 hours or sanitized per below.
- **SUPPLY:** WMLL will maintain a supply of Microban 24 Sanitizing Spray in the equipment/mailroom. Each team in the first game of the day should take a can to their dugout. Each team in the last game of the day should return the can from their dugout to the equipment/mailroom
- **PROCEDURE:** Hold the can 6"-8" from the surface and spray until it's wet - sanitize the mask & chin pad but not the spongy padding inside the helmet. Let the catcher's helmet/mask stand for at least 5 minutes allowing it to air dry.

THANK YOU!
